

BPA RECRUITING 2010

BPA RECRUITING is a unique solution built on SharePoint giving hiring managers and recruiters one place they can go to monitor the candidate pipeline and see listings of positions and candidates.

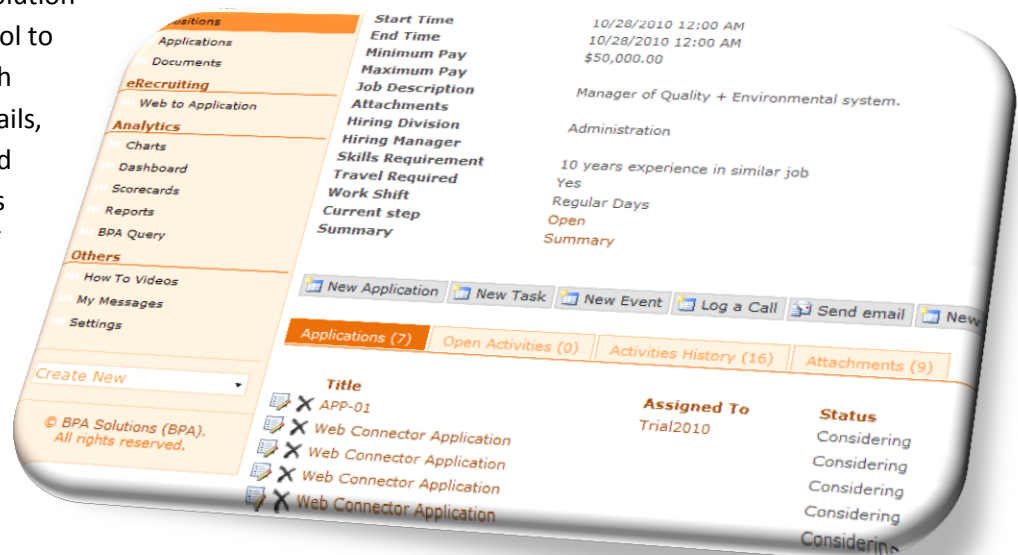

BPA RECRUITING is an – Easy – Flexible – Fast – Economic – Capable – Trendy –solution that will bring huge **EFFECT** and Business outcome.

Candidate Relationship Management

The principles of the CRM model are straightforward: an intense and constant focus on understanding, servicing, and communicating with customers. Customer needs are front and center at all times and every resource of the enterprise is directed toward addressing those needs. Job seekers are considered customers.

Tracking all interactions with Applicants

This candidate-centric solution provides hiring staff a tool to track all interactions with applicants, like calls, emails, tasks and meetings. Build groups and segment lists for easy development of email campaigns. Your staff has a complete overview of all activities, applications and documents related to a candidate in one single place.

Publish open Positions and attract new Talents

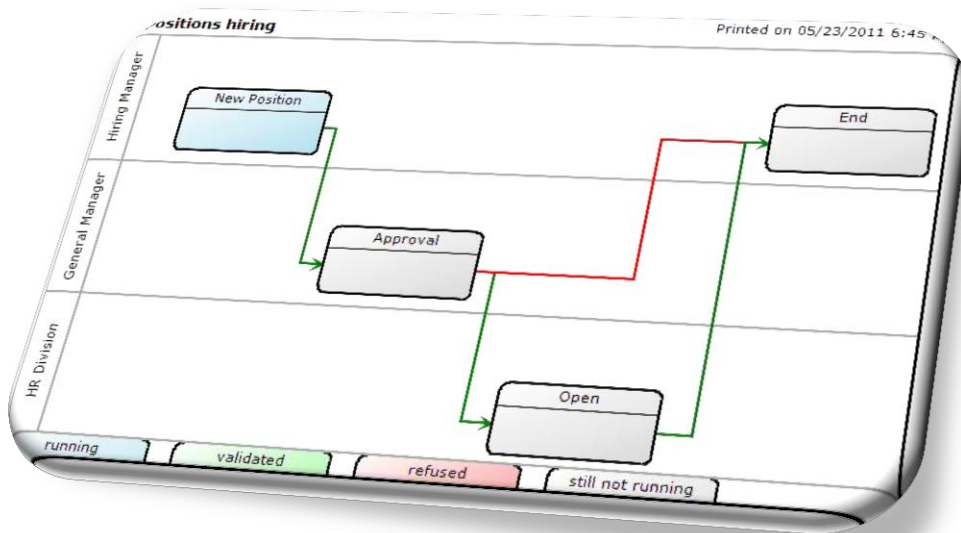

The system provides connectors to publish open positions to your web site or any other recruiting portal to attract new talents. Applications will be automatically added to the system and linked to the right position.

Outlook Integration

From an application received by email you can copy all details and attached documents in BPA RECRUITING in a mouse click. The application will be linked to the right position.

Self-service Portal for Talents

Improve strategic alignment with hiring managers by sourcing, attracting, organizing, and engaging critical talents ahead of business demand. Your dedicated self-service portal is the central place where talents can connect and view open positions, FAQs, participate to on-line surveys and interact with your company. All data will be seamlessly added to your internal recruiting solution and the concerned people will be automatically alerted.

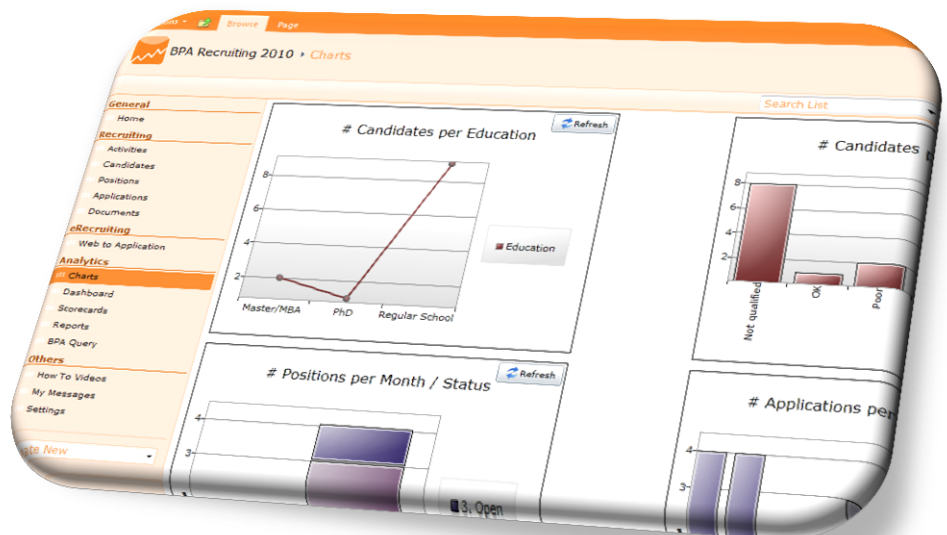

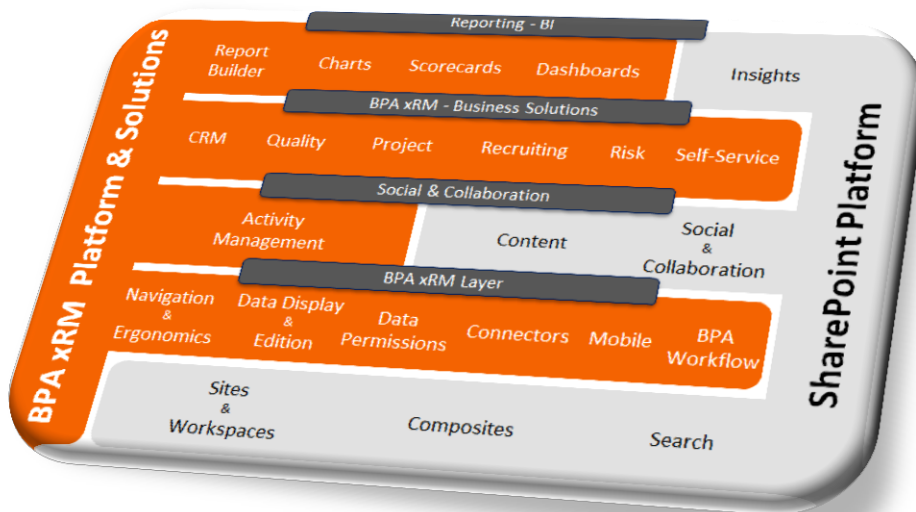

Reducing hiring cycle times

The workflow add-on embedded in the system will push position and application details through the planned steps. The concerned people will get automatic alerts from the system reducing hiring lifecycle times & costs and improving efficiency.

Measuring Success

Reporting tools will help your staff matching open positions with the right applicants. Retrieving any data from the system is quick and simple using the powerful report building tool. Colored flags will tell your staff about overdue tasks, late applications or inactive positions.

Built on BPA xRM Platform

Think. Configure. Ready. The BPA xRM platform complements the robust and scalable Microsoft SharePoint collaboration platform with coherent features driving business efficiency. Functional people can design powerful business solutions in hours and with no need of IT people.

Extend to other BPA xRM Solutions

Each BPA xRM solution has the same features and ergonomics. When extending your application to other out-of-the-box BPA xRM solutions like CRM, Quality, Risk or Project management, you will get a very high user adoption and therefore increase productivity and results across all your lines of business.

Deployment

BPA RECRUITING is available for SharePoint Services, Foundation or Server 2007 or 2010. On-premise or hosted deployments are possible.
