

## **BPA RISK 2010**

BPA RISK is a SharePoint solution to identify, assess, and prioritize incidents and risks with their related controls, actions, procedures and activities to minimize, monitor, and control the probability and/or impact of unfortunate events.

BPA RISK is an – Easy – Flexible – Fast – Economic – Capable – Trendy –solution that will bring huge **EFFECT** and outcome to your SharePoint environment.

### **Total Risk Management**

The solution covers the entire risk management cycle: identification, assessment and measurement of risks as well as implementation of corrective actions and risk related compliance documents and procedures.

BPA RISK meets ISO 31000 guidelines on risk management.

BPA RISK is a standalone and ready-for-use solution. Together with BPA Quality you'll have a complete application to track all improvement processes for your organization.

### **Risk Identification**

End users can report incidents that may be turned in to potential risks. The solution provides a listing of all identified risks. Risks are linked with controls like assets or procedures to minimize and monitor the probability and/or impact of unfortunate events.

### **Risk Assessment**

BPA RISK allows companies to define the acceptable and desirable levels of risk which will allow them to achieve performance.

Risks will be assessed for the defined period based on their likelihood of occurrence and impact.

### **Risk Scorecards**

Risk scorecards display all risk values for the different periods at a glance. Colors instantly tell you about risk criticism. Drilling-down you can quickly view about related actions to avoid or reduce risk values.

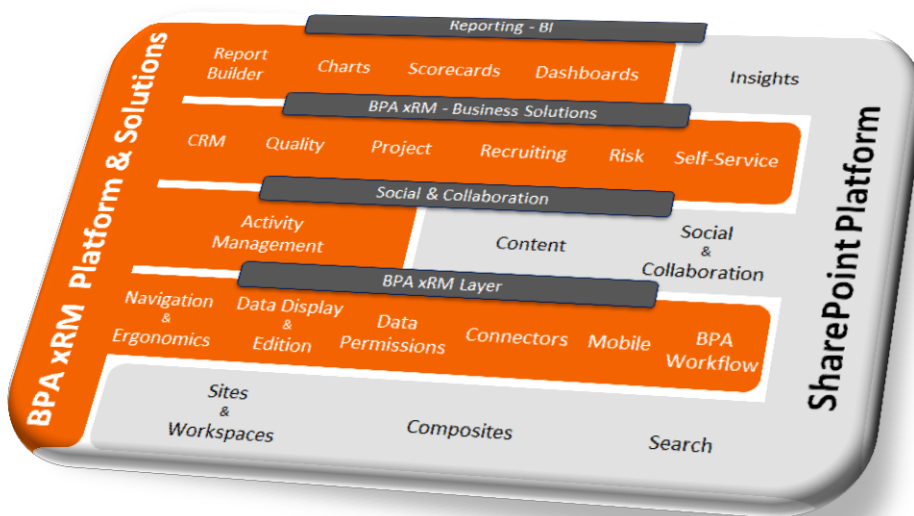

## Risk Treatment

BPA RISK enables preventive or corrective actions to be monitored at each management level. Workflows will guide end users through the planned steps to successfully achieve actions and reduce risk values. Daily tasks, calls, meetings and emails will be tracked in the system.

## Measuring Success

Reporting tools will help your staff to monitor risks and risk treatment. Retrieving any data from the system is quick and simple using the powerful report building tool. Colored flags will tell your staff about late actions or overdue tasks.

## Built on BPA xRM Platform

Think. Configure. Ready. The BPA xRM platform complements the robust and scalable Microsoft SharePoint collaboration platform with coherent features driving business efficiency. Functional people can design powerful business solutions in hours and with no need of IT people.

## Extend to other BPA xRM Solutions

Each BPA xRM solution has the same features and ergonomics. Therefore, when extending your application to others out-of-the-box BPA xRM solutions like CRM, Quality, Recruiting or Project management, you will get a very high user adoption.

## Deployment

BPA RISK is available for SharePoint Services, Foundation or Server 2007 or 2010. On-premise or hosted deployments are possible.
