

BPA SOLUTIONS PARTNER PROGRAM

BPA Solutions has developed a very attractive partner program specifically tailored to Microsoft partners. Increase revenue in becoming a BPA Solutions partner.

Agent / Reseller

The reseller program is specifically dedicated to business consulting companies or other agents that want to resell our solutions to your customers. The customer will order directly from BPA Solutions.

Integrator / Value Added Reseller

You are a company dealing with SharePoint technologies and wish to resell our business applications that add value to your customers. The customer may order directly from yourself or BPA Solutions.

Technical

You're an ISV or solution provider who wishes to add additional value to BPA Solutions applications.

Hosted Service Provider

You are a hosted service provider who is looking to provide our applications in a hosted environment to your customers. BPA applications can be hosted in a shared hosting environment.

Distributor

Your company would like to take benefits from its network and deliver unique business applications to indirect business partners and end customers.

About BPA Solutions

BPA Solutions is a leading provider of out-of-the-box Business Applications built on SharePoint Technologies. BPA Solutions was founded in 2001 and is Microsoft Gold Certified Partner.

About our Applications

Our out-of-the-box applications - like BPA CRM - are ready for use, very user friendly, affordable and 100% customizable with no code. They help our customers worldwide to maximize their SharePoint investment and lower their project costs.

Benefits of BPA Solutions Partner Program

By reselling BPA Business Applications, you'll be able to increase revenue rapidly in a large demanding market, deliver out-of-the-box applications that increase productivity for your customers, deliver related additional products and services and receive high sales incentives.

BPA Business Applications are built on the most successful business collaboration platform – SharePoint; are affordably priced, easy to use, easy to integrate, easy to customize and easy to align with business processes and it fills a gap that currently exists within the Microsoft market.
