

# BPAQuality365®

Reach ultimate quality  
with Microsoft 365  
technologies

Intuitive, agile and  
cost-effective eQMS  
enabling compliance while  
enhancing productivity

**Built on top of Microsoft 365, SharePoint, Teams and Power BI**, our software goes beyond traditional quality management solutions and provides an innovative collaborative platform for the entire company. With unique AI, discussion, automation and mobile capabilities, you can ensure company-wide alignment for continual improvement and a preventative mindset leading to quality products, services and compliance with regulations.

With over 1000 people in the field, we were looking for a **simple solution** everyone could use.

We started by deploying the **document management** module, then we went with global enterprise **risk management** and financial control. Now we are working on the **continuous improvement** part.

*Groupe-E, CH,  
Energy market*

BPA Solutions constantly enables new areas to use **innovative tools** in the context of quality management. Working alongside Microsoft since 15+ years, we have been awarded with the **Microsoft Preferred Status**.
