BPA Solutions

Microsoft 365

Streamline audits management

Audits management fully powered by Microsoft 365 technologies

Facilitate the auditing process and unlock compliance

Auditing is a complex multiple-step process concerning various internal or external stakeholders and requiring close follow-up and precise reporting. Included in our QMS platform, the audit management module simplifies any type of inspection making sure all processes are efficient and the whole quality management system works smoothly.

Easily import your audit checklists to comply with any regulation, as ISO, FDA, MDR, GDPR, ICS, etc. and audit types, such as layered process audits, supplier audits, internal control, etc.

Fully automate the audit process

Easily plan, execute and follow-up audits with the automated 8D workflow.

Get the right persons notified. Automatically produce, approve and share reports.

Audits made easy anywhere

Run inspections securely on any device, even offline.

Take pictures and voice recordings.

All data is automatically synced in BPA's audit management module.

Easily include external stakeholders

Auditors can access the eQMS with no license at 0 cost.

Follow-up actions are automatically assigned.

Automatically generate and share reports.

Streamline audits with Teamwork

Plan audits and cooperate across organizations with MS Teams.

Discuss in real time and assign tasks without leaving the discussion flow.

Accelerate decision making with advanced Power BI reports

Easily access interactive audit reports.

Drill down data for dynamic visualization and actionable insights in coverage and compliance.

Shift to Intelligent Quality

Unlock the full potential of M365 and GenAI in your eQMS

Microsoft Preferred
Microsoft 365 Business Applications

Working alongside Microsoft for over 15 years, with a Microsoft Preferred Status.

Built on top of Microsoft 365, SharePoint, Teams and Power BI, our software goes beyond traditional quality management solutions and provides an innovative collaborative platform for the entire company. With robust automation, secure GenAI, live discussions, and unlimited mobile capabilities, you can ensure company-wide alignment for continuous improvement and establish a preventative mindset facilitating compliance with regulations.

With BPA's QMS solutions, users become active participants in improving the quality of your products and services, enhancing teamwork and reaching intelligent quality. Facilitate ISO, FDA, MDR, GxP, 21 CFR Part 11 and GDPR compliance with our all-in-one eQMS!

BPAQuality365® and **BPAMedical365®** accelerate decision-making and eliminate cumbersome email-driven processes. Users interact with the QMS while discussing in Teams and get instant information by asking Q, BPA's GenAI-powered chatbot, simplifying problem-solving by finding similarities, proposing actions, root causes, and summarized content.
